Check out the latest features available from ClearGov.

BUDGETS

- Sub-requester Permissions

WIDGETS

- New Name for Application
- Rename the 'Goal' Line in Charts

CUSTOM CHARTS

- New Name for Application

COMMENTS

- **NEW:** Landing Page Redesign

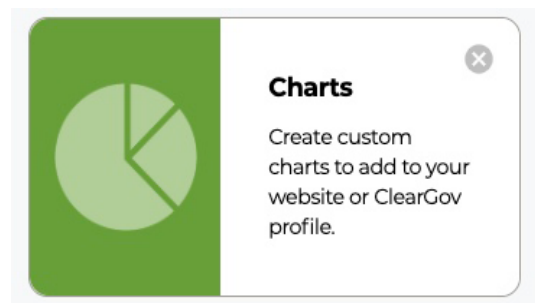

PROJECTS

- Batch Email Updates

WIDGETS

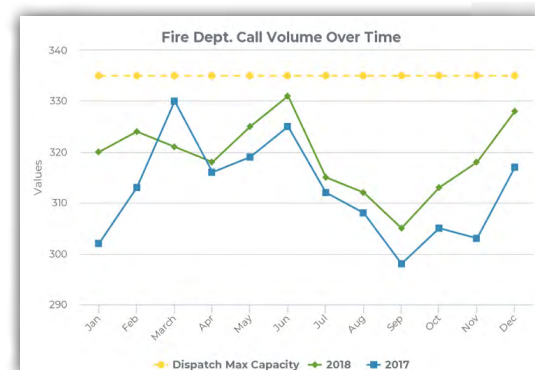

New Name for Application

The Widgets App has been renamed 'Charts' to better reflect the application's functionality.

Rename the 'Goal' Line in Charts

Users creating a custom trending chart can now rename the 'add goal' option to better fit their use case.

BUDGETS

Sub-requester Permissions

When adding a budget sub-requester you can now choose whether or not this user can add line items.

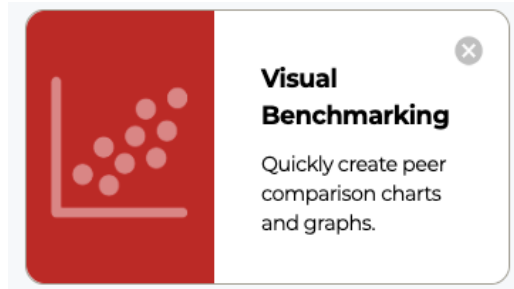

☐ Allow user to add new line items

- This enhancement allows chart creators to add this goal line for a variety of use cases where the target line isn't necessarily a goal.
- For example, if a department is creating a custom chart for call volume over time, they could include a 'dispatch max capacity' line to show the volume of calls their dispatch team is equipped to handle.

CUSTOM CHARTS

New Name for Application

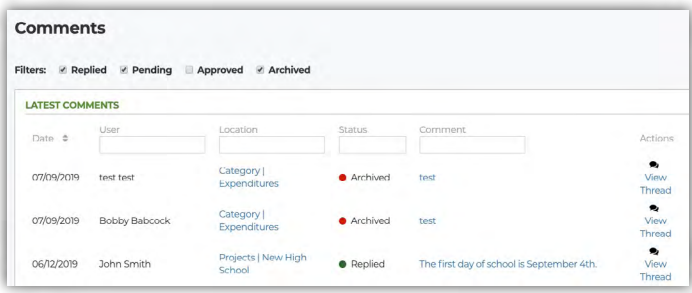

The Custom Charts App has been renamed 'Visual Benchmarking' to better reflect the application's functionality.

COMMENTS

NEW: Landing Page Redesign

The landing page has been redesigned to provide an improved user experience.

- **Threads:** Comments are grouped by thread to keep the dialogue organized.
- **Status Indicators:** Each thread will have a color-coded status indicator - allowing the user to quickly see which comments have been approved, are awaiting a response, or are archived.
 - Green = approved or replied to
 - Yellow = pending
 - Red = archived
- **Filters:** Filters have been added for users to quickly filter comments by all, pending or archived to adjust their view.

PROJECTS

Batch Email Updates

When residents subscribe to a project they will now only get one email per day (if changes were made to the project) instead of receiving multiple emails throughout the day each time the project was updated.

- This will consolidate updates into one email so they can follow updates easier.
- Email updates will get distributed at 5pm EST.
