BUDGETS

- Audit Trail Improvements
- Non-recurring Line Items Update
- Load Time Improvements
- Copy Line Item Descriptions
- Copy Contributor List

DEPARTMENT DASHBOARDS

NEW: Dashboard Creation Process

Users can now start out with no default dashboards and may click "Create New Dashboard". The user would then name the dashboard and choose an icon. If they would like a new icon they may request this via their Client Success Manager.

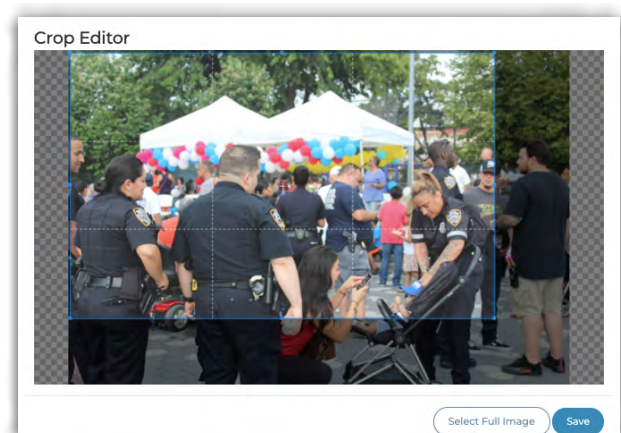

Rearrange Department Tiles

Dashboard creators may simply drag and drop the dashboard tiles on their transparency page to their preferred order.

Image Resize and Crop Editor

Users can now resize and crop images that are added to custom panels.

TRANSPARENCY

State Abbreviations Added to Banner

Claimed ClearGov profiles show the state abbreviation in the banner.

Hide Debt Panel if no Debt

Page creators have the ability to hide the debt panel from their transparency page if they do not have debt for any of the years displayed.

'Download Financials' Control

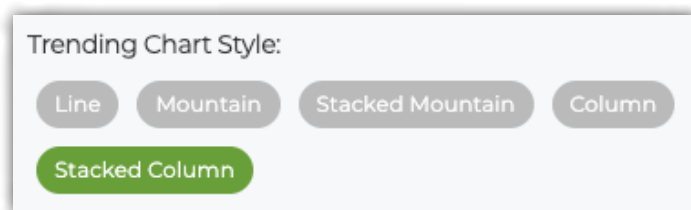

A new 'Download Financials' toggle has been added to the back office to give users the ability to hide this option - preventing public viewers from being able to download financials from the page.

CHARTS

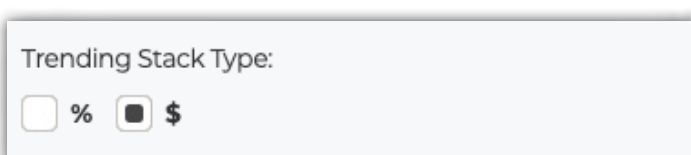

NEW: Stacked Column Option

When a chart creator selects 'Trending' chart type, a new 'Stacked Column' option is now available. 'Stacked Column' charts function like 'Stacked Mountain' charts but show stacked category totals with columns instead.

Stacked Chart Type: % or \$

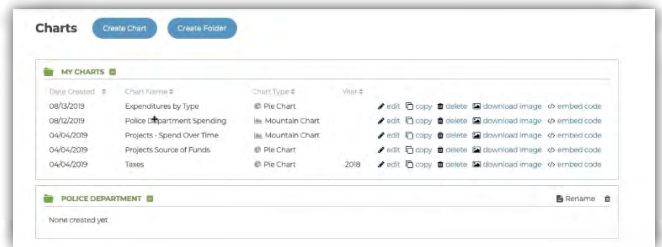

In the Stacked Mountain and Stacked Column (NEW) chart options, users can select either % (which shows each category as a percentage of spending) or \$ (which stacks the dollar totals).

CHARTS CONTINUED

NEW: Chart Folders

Users can create folders for charts and then drag-and-drop charts into folders to help keep charts organized and easy to find.

Scrollable Left Navigation

The left hand navigation for the Chart Editor now moves independently from the chart viewing area for a better user experience.

BUDGETS

Audit Trail Improvements

New audit trail improvements provide more detail and a better history of what has occurred.

Non-recurring Line Items Update

Non-recurring line items were not showing up in the next year's budget. This has been changed so that the line item does show in the next year budget, but shows \$0. These lines are also now included in the download files.

Load Time Improvements

The Budgets Dashboard now loads in sections and has been updated to load much faster.

Copy Line Item Descriptions

This function has been added to the 'Create New Budget' screen and on description modals.

Copy Contributor List

This function has been added to the 'Create New Budget' screen.
